"A notebook for your father"

If you have decided to make a present for your father it will be very interesting to make a notebook, the faceless purchased thing can be changed, having decorated a boring cover by means of a fabric and various ornaments.

For the cover of notebook it is necessary to choose a dense fabric, such as velveteen. Most easier to cut out a cover on width of the opened book plus spaces on 5-8 sm on edges, and then stitch it manually a decorative external seam, using thick a thread in tone or, on the contrary, contrast color. Then you can decorate the cover of the notebook as you like, you can make drawing or application of some flowers. It will be fun.
